

THE UMaT ACADEMAL ARSENAL

The Underground Toolkit for High-Performance Engineering & Tech Students

Built specifically for UMaT students grinding through:

-  Mining Engineering
-  Electrical & Electronic Engineering
-  Computer Science & Engineering
-  Robotics & AI
-  Mathematics & Data Science
-  Petroleum Engineering
-  Renewable Energy Engineering
-  Heavy science and technical courses

If you're tired of:

-  cramming before exams
-  getting distracted every 10 minutes
-  staring at confusing lecture slides
-  wasting hours studying inefficiently
-  struggling to balance coding, assignments, labs, and projects

...this Arsenal was built for you.

Inside, you'll discover:

-  AI prompts engineered for technical courses
-  Exam domination workflows
-  Deep-focus study systems

-  Engineering problem-solving shortcuts
-  Career advantage AI hacks most students are NOT using

Powered by LOCKED-IN™ 

SECTION 1 — AI ENGINEERING HACKS

1. THE “TEACH ME LIKE A TOP UMaT SENIOR” PROMPT

Copy & Paste:

“I am a UMaT engineering student studying [TOPIC].

Teach me this topic from beginner level to exam level progressively.

Use:

- engineering-based explanations
- practical industry examples
- real-world applications
- visual descriptions
- step-by-step derivations
- simplified explanations before advanced concepts

Then:

1. explain common mistakes students make
2. generate likely exam questions
3. show shortcut solving techniques

Teach like a brilliant final-year student helping me pass exams.”

🔥 BEST FOR:

- Engineering Mathematics
 - Differential Equations
 - Calculus
 - Circuit Analysis
 - Mechanics
 - Thermodynamics
-

2. THE “STEP-BY-STEP ENGINEERING SOLVER” PROMPT

Copy & Paste:

“Solve this engineering/science problem step-by-step.

For EVERY step:

1. explain the formula used
2. explain WHY it applies
3. substitute values clearly
4. simplify calculations carefully
5. include units
6. explain common mistakes students make

Then provide:

- a faster exam-solving method
- a memory trick for the formula

Problem: [PASTE QUESTION]”

🔥 BEST FOR:

- Applied Electricity

- Physics
 - Engineering Maths
 - Fluid Mechanics
 - Chemistry calculations
-

3. THE “DEBUG MY CODE LIKE A SOFTWARE ENGINEER” PROMPT

Copy & Paste:

“I am a university student learning [LANGUAGE].

Analyze this code like an experienced software engineer and lecturer.

Tasks:

- identify ALL errors
- explain why each error occurs
- rewrite the corrected version
- optimize the logic
- suggest cleaner approaches
- explain how this concept appears in technical interviews and exams

Code: [PASTE CODE]”

 BEST FOR:

- Python
 - C++
 - Java
 - Arduino
 - AI Projects
 - Automation Scripts
-

4. THE “TURN LECTURE SLIDES INTO EXAM REVISION” PROMPT

Copy & Paste:

“These lecture slides are confusing.

Transform them into:

- simplified revision notes
- concise summaries
- formula sheets
- memory tricks
- likely exam questions
- flashcards
- active recall questions

Then create:

1. a 1-hour revision crash course
2. a likely mock test
3. a high-score exam strategy

Slides: [PASTE CONTENT]”

 BEST FOR:

- Dense PowerPoint lectures
- Midsem prep
- Last-minute revision

5. THE “PAST QUESTIONS DOMINATION” PROMPT

Copy & Paste:

“Analyze these past questions deeply.

Identify:

- repeated concepts
- lecturer patterns
- hidden trends
- easiest marks students miss
- difficult concepts repeatedly tested

Then generate:

1. a predicted revision roadmap
2. high-priority topics
3. a likely mock exam
4. answering strategies for maximum marks

Questions: [PASTE PAST QUESTIONS]”

 BEST FOR:

- Midsems
- End-of-semester exams
- Smart revision planning

6. THE “SIMPLIFY THIS CONFUSING ENGINEERING CONCEPT” PROMPT

Copy & Paste:

“I am struggling to understand this topic:

[PASTE TOPIC]

Break it down using:

- simple explanations

- practical engineering examples
- visual analogies
- real-life applications
- step-by-step logic

Then explain:

1. why students usually struggle here
2. how lecturers test this topic
3. how to master it quickly.”

🔥 BEST FOR:

- Electromagnetism
- Signals & Systems
- Data Structures
- Machine Design
- Control Systems

7. THE “24-HOUR EXAM RECOVERY” PROMPT

Copy & Paste:

“I have an exam in less than 24 hours for [COURSE].

Teach me ONLY:

- high-yield concepts
- commonly tested formulas
- repeated question styles
- solving shortcuts
- important derivations
- concepts most likely to appear

Ignore low-priority content completely.”

🔥 BEST FOR:

- Emergency revision
 - Midsems
 - Exam week survival
-

8. THE “ENGINEERING FORMULA MASTER” PROMPT

Copy & Paste:

“For this topic:

[PASTE TOPIC]

Generate:

- all important formulas
- meaning of each variable
- SI units
- formula relationships
- common mistakes
- memory tricks

Then create:

1. a mini formula sheet
2. 5 practice questions
3. a formula comparison table.”

🔥 BEST FOR:

- Physics
 - Electrical Engineering
 - Thermodynamics
 - Engineering Mathematics
-

9. THE “LAB REPORT ASSISTANT” PROMPT

Copy & Paste:

“Help me write a professional engineering/science lab report.

Experiment: [PASTE EXPERIMENT]

Generate:

- objective
- theory
- apparatus
- methodology
- calculations
- discussion
- error analysis
- conclusion
- recommendations

Write professionally like a top engineering student.”

 BEST FOR:

- Physics Labs
- Engineering Practicals
- Chemistry Labs

10. THE “FINAL YEAR PROJECT & PORTFOLIO BUILDER” PROMPT

Copy & Paste:

“I am a UMaT student interested in [FIELD].

Generate:

- practical project ideas
- AI-related ideas
- automation ideas
- industry-relevant solutions
- beginner-friendly projects
- impressive portfolio projects

For each project include:

1. difficulty level
2. required tools
3. technologies needed
4. real-world relevance
5. how impressive it looks on a CV.”

🔥 BEST FOR:

- Final Year Projects
- Portfolio Building
- Internship Preparation
- Career Development

SECTION 2 — THE LOCKED-IN FOCUS PROTOCOL ⚡

The Deep Work System Built for Technical Students

Engineering students do NOT fail because they are unintelligent.

Most fail because:

- their attention is destroyed
- their study systems are weak
- they revise passively
- they overload themselves before exams

The LOCKED-IN Protocol fixes that.

THE LOCKED-IN DAILY SYSTEM

PHASE 1 — TARGET LOCK (10 MINUTES)

Before studying: ✓ Put phone on Do Not Disturb ✓ Close unnecessary tabs ✓ Write ONE clear target ✓ Open only required materials ✓ Set a 50-minute timer

Rule: Never “study randomly.”

Attack specific problems.

PHASE 2 — DEEP WORK SPRINT (50 MINUTES)

During the session: ✗ No TikTok ✗ No WhatsApp ✗ No Instagram scrolling ✗ No multitasking ✗ No switching subjects

ONLY: ✓ solving questions ✓ coding ✓ derivations ✓ active recall ✓ calculations ✓ project work

IMPORTANT:

Reading passively is NOT studying.

Real studying means:

- solving

- practicing
 - recalling
 - explaining
 - building
-

PHASE 3 — RESET MODE (10 MINUTES)

During breaks: ✓ Walk around ✓ Stretch ✓ Drink water ✓ Avoid social media

Social media destroys concentration momentum.

PHASE 4 — RETENTION MODE (15 MINUTES)

Before ending: ✓ Rewrite formulas from memory ✓ Explain concepts without notes ✓
Identify weak areas ✓ Write tomorrow's first study target

This is where long-term retention happens.

THE 3-SESSION RULE

Forget fake 10-hour study sessions.

Instead: 🔥 3 elite distraction-free sessions daily 🔥 fully focused 🔥 highly intentional

That alone can outperform most students on campus.

FINAL MESSAGE ⚡

UMaT is filled with intelligent students.

But intelligence alone is not enough anymore.

The students who win today:

- leverage AI
- build systems
- learn practical skills
- stay consistent
- operate with discipline

That is what LOCKED-IN was built for.

READY TO LOCK IN?

 Join the LOCKED-IN platform.

Inside LOCKED-IN, you'll get:  gamified study systems  focus streaks  study rooms  productivity challenges  engineering student communities  AI automation masterclasses  portfolio-building workshops  career-focused tech training  exclusive student resources

Stop studying randomly. Start operating like a high-performance engineer.

LOCKED-IN™ Built for ambitious students at UMaT.
